2025 | Collin County Thoroughfare Plan Update

What is a Thoroughfare Plan?

A **long-range planning document** used by local governments to set a vision for the development and improvement of a city's or region's transportation network.

It **identifies the location and type of roadway** for all major city, county and state thoroughfares – both existing and proposed – that are part of the future road network.

How often is it updated?

The Collin County Thoroughfare Plan was **previously updated in 2014 and 2020**. Collin County updates the County's Thoroughfare Plan **every 5 - 10 years** in coordination with municipalities, adjacent counties, and TxDOT to ensure a well-organized transportation system.

Thoroughfare Definitions

PRINCIPAL ARTERIALS – Principal arterials are high-capacity roads that provide key linkages between cities, identifiable neighborhood areas, and major activity centers; carry intra-regional traffic; and connect traffic from minor arterials to freeways or expressways.

MAJOR ARTERIALS – Major arterials are roads that carry local traffic to principal arterials and may be four to six lanes depending on traffic demand. The Thoroughfare Plan aims to locate major arterials on approximately 1-mile grid spacing. Major arterials provide intra-community continuity and generally offer a lower level of capacity.

Next STEPS:

A Public Hearing will be held at an upcoming Collin County Commissioner's Court meeting. Please provide your email on the sign-in sheet if you would like to receive notifications regarding that hearing.
